RE: NLCC comments on revised Bogard-Seldon Corridor Access Management Plan

Dear Ms. Spackman,

The North Lakes Community Council (NLCC) strongly supports the Corridor Access Management Planning process and appreciates that many of the comments we submitted in November 2024 were taken into consideration. Thank you.

As DOTPF and MSB road improvement projects are identified for funding and development as contemplated in the CAMP, the NLCC would like to participate with government planners during the project scoping and preliminary engineering processes. This early engagement will provide an opportunity for NLCC members and residents to suggest specific solutions as the project is designed and constructed.

We also recognize there are a number of connecting road and improvement projects within our community boundaries that are outside the scope of the CAMP. The NLCC wishes to restate our strong community concern that projects are prioritized based on existing and forecasted traffic levels. We also request early engagement during project scoping and preliminary engineering. Specifically, we wish to see separated and dedicated bike & pedestrian paths for safety; wider lanes; adequate shoulders; and traffic calming measures on these specific roads:

- Bogard Road from the Bogard-Seldon-Grumman Roundabout to Wasilla
- Green Forest Road
- Moose / Charley / Mariah connector between Bogard and Wasilla Fishhook
- Lakeview Drive
- Engstrom Road
- Arabian Drive
- Green Tree
- Keith Drive
- Radon
- Fir from Cottonwood Loop to Finger Lake School
- Cottonwood Loop from Fir to Bogard
- Fireweed Drive

The NLCC has a standing Committee focused on Road & Traffic Safety. We are intimately familiar with the issues along the major routes contemplated in the CAMP and the connecting neighborhood roads. We would like our voices heard early enough to make a difference.

Sincerely,

Rod Hanson
North Lakes Community Council
